PROJECT

- **LeetCode Profile Analyser**
 - Built a full-stack analytics platform using **React** and **FastAPI** to process LeetCode profile data through **GraphQL** APIs.
 - Computed topic-wise accuracy, difficulty trends, and submission streaks, presenting insights through interactive charts and heatmaps.
 - Developed a recommendation engine that identifies weak concepts from solving patterns and generates personalized practice plans using **LLMs**.
- **Movie Recommendation System**
 - Developed a content-based movie recommendation system that suggests similar movies based on user preferences.
 - Processed and analyzed movie metadata using **Pandas** and **NumPy** to generate feature vectors for recommendations.

POSITIONS OF RESPONSIBILITY

- **DSA Mentor, Google Developer Group(GDG), NSUT** **2024 - Present**
 - Mentored students in **Data Structures and Algorithms (DSA)**, conducting doubt-solving sessions and guiding peers on problem-solving techniques and coding best practices.
 - Assisted in organizing and managing Shunya, the annual flagship event of the society, contributing to event planning, coordination, and smooth execution.
